

Automated Scrub Management
ScrubServe is a cost-effective patented solution for scrub management

ScrubServe Receiver

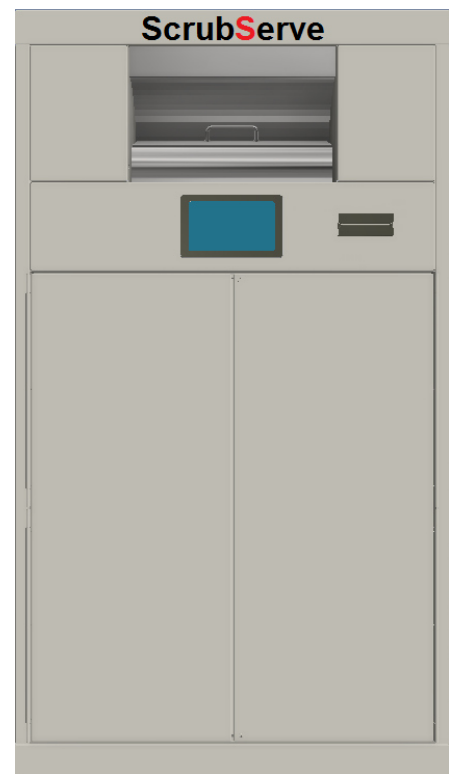

The ScrubServe Receiver unit provides credit for returned scrubs, and records a digital image of all returned items to eliminate inventory abuse.

By ensuring scrubs are only issued to authorized staff, and that they are securely returned after use, your inventory replacement costs and associated hospital laundry costs can be controlled and minimized.

Staff will no longer be able to hoard inventory in their lockers, unauthorized staff will no longer have access, and staff that require clean uniforms can be confident of obtaining the size they need when they require it.

ScrubServe helps to eliminate possible cross-infection by specifically separating uniform dispensing from uniform receiver deposits.

The receiver has the same footprint as our Dispenser unit so they can be conveniently located side-by-side in corridors and staff locker rooms.

- ✓ Touch-screen operation for ease of use
- ✓ Returned scrubs provide a credit to the applicable staff member
- ✓ Internal collection bag eliminates double-handling of soiled scrubs
- ✓ Chute can only be operated with an authorized staff ID-card
- ✓ All ID-card types supported – e.g. barcode, magstripe, proximity or PINs
- ✓ “Split-bin” operation means credit is given for a complete scrub set (bottom and top) returned
- ✓ Receiver captures digital image of every deposit for each ID-card
- ✓ Universal 100-240vAC 50-60Hz basic power requirements
- ✓ Receiver Size: 1833mm High, 999mm Wide, 455mm Deep
